vo.technology

# Built for the next era of intelligent enterprise.

## WHAT WE DO

VO for Technology delivers cutting-edge IT consulting, software engineering, and AI-powered solutions to organizations across the Middle East and beyond. We bridge complex technology and real business results.

## MISSION

Empower organizations with intelligent, scalable technology that drives measurable growth and competitive advantage.

## VISION

To be the most trusted technology partner for enterprises navigating digital transformation in the region.

## CORE VALUES

### Innovation

Pursuing technology frontiers so clients never fall behind.

### Integrity

Transparent partnerships built on trust and accountability.

### Agility

Fast delivery cycles that keep pace with evolving needs.

### Partnership

Long-term relationships, not just one-time projects.

# Three pillars. One integrated approach.

01

## Outsourcing

Dedicated senior engineers and consultants embedded into your teams — without the overhead of full-time hiring. Scale up or down with agility.

Staff Augmentation

Engineering Teams

Consulting

02

## Solutions & Products

End-to-end software development using industry-leading frameworks. From CRM and ERP platforms to custom enterprise applications and mobile experiences.

.Net Core

Node.js

Laravel

Creatio

Odoo

Mobile

03

## Data Analysis & AI

Intelligent systems that transform raw data into strategic decisions. Machine learning, automation pipelines, and AI-driven analytics at enterprise scale.

Machine Learning

Predictive Analytics

Automation

# From raw data to intelligent decisions.

VO's AI and Data division uses data-driven methods and intelligent algorithms to generate insights, automate processes, and solve complex business problems — empowering enterprises to make informed, confident decisions at speed.

## Core Capabilities

Predictive modeling · Anomaly detection · NLP · Computer vision · Real-time dashboards · Automated reporting · Recommendation engines

## Deployment Models

Cloud-native · On-premise · Hybrid · API-first · Production-grade ML pipelines · Domain-specific model training

## 01 Data Collection

Integrate structured databases, APIs, IoT sensors, and unstructured sources into a unified, clean data foundation at enterprise scale.

## 02 Data Processing

## 03 Machine Learning & AI Models

Custom ML models trained on domain-specific datasets — classification, regression, anomaly detection, NLP, and computer vision — deployed at production scale.

## 04 Insights & Decision Support

Interactive dashboards, automated reports, and AI-powered recommendation engines that turn model outputs into actions decision-makers can trust.

# Real impact across key sectors.

## GOVERNMENT

### Smart City Operations

AI-powered dashboards for municipalities in Saudi Arabia, Kuwait, and the GCC — enabling real-time resource management and urban planning.

## FINANCE

### Risk & Fraud Detection

ML models analyzing transaction patterns to flag anomalies in real time — deployed for central banking and financial institutions across the region.

## AGRICULTURE

### Predictive Resource Planning

Data analytics for the Ministry of Environment supporting water and crop optimization through satellite data and predictive modeling.

## RETAIL & E-COMMERCE

### Demand Forecasting

AI-driven inventory and demand prediction systems, reducing waste and stockouts for regional retail chains and logistics operators.

## PUBLIC SECTOR

### Digital Service Delivery

End-to-end software platforms for ministries — digitizing citizen services, automating workflows, and integrating cross-departmental data.

## HAJJ & RELIGIOUS AFFAIRS

### Crowd & Logistics Intelligence

Real-time crowd analytics and logistics optimization for mass-gathering management — improving safety and operational efficiency at unprecedented scale.

— OUR CLIENTS

# Trusted by leading organizations across the region.

## GOVERNMENT & PUBLIC SECTOR

- Royal Commission for Riyadh
- Amanah Makkah Al-Mukarramah
- Amanah Al-Taif
- Kuwait Municipality
- Ministry of Hajj & Umrah
- Ministry of Interior
- Min. of Municipal Affairs
- Min. of Environment & Water
- KACST
- Central Bank of Libya

## ENTERPRISE & PRIVATE SECTOR

- B.Tech
- Bin Dalbah Trading
- AlDahayan Trading
- Saleh Cars Group
- Three S
- AlHamidi Cars
- AlSharaf Cars
- Rotana Cars
- Class Cars
- Dagmal

— OUR PRODUCTS

- GeoBank
- Vehicle Tracking System
- PMO Cloud
- Correspondence Tracking and Management System
- ISignage Pro
- Geo Sales Manager
- Automotive Industry ERP (4SPlus)
- GEO ETL

— OUR PARTNERS

# Strategic alliances that extend our capabilities.

Platform Partner

— WHY CHOOSE VO

# Built different. Proven to deliver.

## 01 Regional Expertise, Global Standards

Deep GCC market knowledge, Arabic-language capability, and internationally validated engineering practices — in one team.

## 02 Government-Proven Track Record

Trusted by Saudi ministries, royal institutions, and municipalities for mission-critical platforms at national scale.

## 03 Full-Spectrum Technology Coverage

One accountable partner for the full stack: applications, ERP, AI, cloud, cybersecurity, and data — no gaps, no handoffs.

## 04 Outcome-Oriented Engagement

We align deliverables directly to business KPIs. Client success is the only measure we hold ourselves to.

**11+**

Government & enterprise clients across Saudi Arabia, Kuwait, and Libya

**8+**

Core technology frameworks · 1,800+ specialist skills deployed

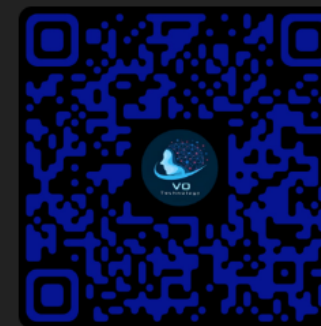

**360°**

Technology coverage — consulting, build, data, AI, cloud & security

— LET'S BUILD TOGETHER

# Your next technology advantage starts here.

Whether you're accelerating digital transformation, deploying AI at scale, or seeking a reliable technology partner — VO for Technology is ready.
